

Shaping the future: Educating responsible professionals Call for Abstracts

14th International Conference on Ethics Education
June 24-26 2026 Amsterdam, De Bazel

This conference aims to bring together educators, researchers, academics, (health) professionals and students for mutual learning and debate on the current status quo in the field of ethics education and Responsible Conduct of Research (RCR) and its relevance to shape professionals. What is achieved in training and education, and what steps are needed in the near future in order to help stimulate responsible professionals? What moral competences are professionals expected to develop and what type of knowledge, skills, attitude and behaviour can be trained via (formal and informal) education? How do current innovations (e.g. AI) challenge ethical education practices and approaches?

TOPICS

- Research on ethics education (*medical ethics, medical humanities, life sciences, environmental studies, science and technology, humanities, social sciences*)
